

CIVIL & ENVIRONMENTAL ENGINEERING GRAD STUDENT SEMINAR

From Classroom to Career, Engineering Florida's Connected Future

Friday, October 23
12:30 PM
COE A322

Christine Shafik, PE

STATE CONNECTED MOBILITY & TECHNOLOGIES ENGINEER
Traffic Engineering & Operations, Florida Department of
Transportation

ABSTRACT: The Florida Department of Transportation (FDOT) is a national leader in advancing transportation safety, mobility, and innovation. In this presentation, Christine Shafik, leader of FDOT's Connected Mobility and Technologies Program, will share insights into Florida's deployment of connected and automated vehicle technologies, statewide arterial management, wrong-way driving prevention, managed lanes operations, and data-driven traffic management systems. She will also reflect on her professional journey, discussing key challenges, lessons learned, and the skills and mindset needed to succeed in a rapidly evolving engineering field. Attendees will gain a deeper understanding of emerging transportation technologies, the future of the industry, and practical career advice from a leader shaping Florida's transportation network.

This event is sponsored by FAMU-FSU College of Engineering and
Department of Civil and Environmental Engineering
