

CIVIL & ENVIRONMENTAL ENGINEERING GRAD STUDENT SEMINAR

Engineering in Action: Real-World Perspectives on Materials, Infrastructure, and Career Pathways

Friday, October 16
12:30 PM
COE A322

James A. Musselman, Ph.D.

STATE ASPHALT MATERIALS ENGINEER
Florida Department of Transportation

ABSTRACT: Jim Musselman from the Florida Department of Transportation (FDOT) will provide an overview the various functions that FDOT performs; He'll discuss some of the major materials-related activities being conducted at the FDOT State Materials Office in Gainesville, FL. Musselman will also share some of his real-world experiences working as an engineer not only for a government agency, but also his experiences from the private sector as well as academia.

BIO: Jim Musselman is the State Asphalt Materials Engineer for the Florida Department of Transportation, where he is involved in a few activities related to the design, construction, and materials utilization of asphalt pavements in Florida. Jim has also worked as a Senior Engineer for the National Center for Asphalt Technology (NCAT), and as an Asphalt Performance Manager for CRH Americas Materials. He has worked in the area of asphalt pavement materials and construction for over 40 years and has both a bachelor's and master's degree in civil engineering from the University of Florida. He is also a registered professional engineer in the State of Florida.

This event is sponsored by FAMU-FSU College of Engineering and
Department of Civil & Environmental Engineering
