

CIVIL & ENVIRONMENTAL ENGINEERING GRAD STUDENT SEMINAR

Using Fiber Reinforced Polymer (FRP) Material in a Florida Panhandle Bridge Replacement Project with Extremely Aggressive Environment

Friday, March 13
12:30PM
COE B134

Patel, Greene and Associates (PGA) is a leader in innovative transportation engineering, as well as planning, GIS, environmental, and landscape architecture. PGA takes pride in providing cost-effective engineering solutions that fit the needs and budget of each project and client. This seminar will provide an overview of the various work they do, a “day in the life of a consultant civil engineer”, and a case study.
