

**FACULTY RECOMMENDATION for
FAMU-FSU Engineering Ambassador Network
Applicant**

Candidate Name:		Date:	
-----------------	--	-------	--

To the Recommender:

The national mission statement of the Engineering Ambassador Network program is:

To be an assembly of highly motivated students focused on inspiring a younger audience to explore the role of engineers in our society.

The application and selection process is an important part of the EA experience. Selecting only highly motivated and capable students who share a common interest in the engineering profession encourages excellence in inspiring the K-12 audience to connect with our message. During the selection process, the EA selection committee considers the opinions of those who know EA applicants to be vitally important.

Some of the personal and professional characteristics that we look for in an EA candidate include:

- Real passion for engineering with the desire to share with others
- Decent communication skills—the EA program involves communication training so we are looking to build on potential
- Creative, innovative with a can-do attitude
- Good time management skills
- Enjoys collaborating and working in a team
- Respectful and with a willingness to improve—often EAs are asked to critique the work of another student
- Not overly committed with myriad organizational memberships—specifically in time-consuming leadership roles

We ask that you take the time to give us a realistic evaluation of the individual named above. Thank you for your assistance.

Faculty Name:		Dept:	
How long and in what capacity have you known this student?			
Which of their traits stand out?			
What do you think the applicant is passionate about and how have they demonstrated that to you?			
Over the time you've known the student, how have they grown?			
Has the student demonstrated an active role in their learning? If so, what's an example?			
Do you recommend this person to be an Engineering Ambassador?			
	YES	NO
